

# GENERAL GAS LANTERN MAINTENANCE

## NATURAL GAS

Follow these instructions to maintain proper working order for your Gas Lanterns. Maintaining your Gas Lanterns will keep them working correctly for a long time. These processes are suggested 2–4 times a year, or as needed.

- Make sure the gas is turned off to the lantern and it has at least 10 minutes to cool off
- Check the slit in the top of the burner stem for debris and carbon build up
- You can use dental floss to clear the opening up to allow for uninterrupted gas flow
- Make sure the chimney is free and clear of debris
